San Diego County TOP SCHOOLS
Scores & Ranking for 2012-2013
Academic Performance Index (API) Report

The Academic Performance Index has a scale from 200 to 1,000, based on how well the students score on California standardized tests.

* means this API is calculated for a small school or LEA, defined as having between 11 and 99 valid Standardized Testing and Reporting (STAR) Program test scores included in the API. The API is asterisked if the school or LEA was small in either 2012 or 2013. APIs based on small numbers of students are less reliable and therefore should be carefully interpreted.

"B" means the school did not have a valid 2012 Base API and will not have any growth or target information.

"C" means the school had significant demographic changes and will not have any growth or target information.

New schools, alternative, continuation schools and those with 100 or fewer students were not included.

School Type: "E" Elementary, "M" Middle , "H" High
